

eSoft-Biz is in the software development for more than a decade and over the years has developed a complete integrated ERP (Key2Biz) for the manufacturing industry. The objective of Key2Biz is to cater the new emerging challenges of the industry with special emphasis on production and manufacturing industry.

Introduction

Key2Biz is a web-based ERP solution, simplifying back-office process automation for mid-sized and growing business. It provides real-time information about finance, order management, purchase, inventory, employee management, e-commerce and much more. With Key2Biz, you can speed up your business cycles, improves productivity and reliability, and offer higher level of services to customers, suppliers and partners.

Suite # 607, West Land Trade Center, Shaheed-e-Millat Road Karachi.

Business Development

Key2Biz is designed to effectively manage and navigate business activities. It provides immediate access to vital information that ultimately enhance customer service, streamlined operations, and increases business capabilities.

Cost Management

Key2Biz provides extensive cost information at different levels that eventually helps the business owner to identify cost elements so that he can reduce product cost. Product manufacturing cost is formulated based of parameters like raw material cost, packing cost, and semi finished product cost etc.

Forecasting

Powerful features like reporting and graphical representation of facts & figures transform organization's data into an insight needed to forecast future and also help in planning and analysis. This feature also gives critical information about the business which helps to make better and timely decisions.

Features of Key2Biz

- No client installation
- Time and location free
- Secured access
- User friendly
- Modules include Financial accounting, Attendance & payroll, Stock management, Sales and dispatch, Online graphical reporting, MIS

Advantages

Maintenance & Support

Being a web based solution, it is easy to carry out maintenance and support as most of the time it is provided online by eSoftBiz. With low yearly maintenance cost, Key2Biz enable it's customers to stay up to date with state of the art technologies and product updates.

Remote access

Key2Biz allow its remote users like executives and sales representatives to access it from anywhere anytime. What they need is to have an internet connection.

Low cost

Unlike other ERP solutions, Key2Biz can be purchased in individual modules so that it becomes easier for the companies to purchase and implement it without having to worry about huge initial investment.

Customizable

Key2Biz allows each module to be implemented separately, so it can be customized according to the need of the user. This customization makes Key2Biz a feasible ERP solution.
